ERLINDA’S WISH PROGRAM

SPRING 2016

UNIVERSITY OF TEXAS
AT SAN ANTONIO
I would like to let everybody know how I did in my computer class. How I learned to use more commands. It was an opportunity to do more for my department and focus on helping my co-workers. Motivate them to learn just the way I did.

The first thing was the attendance and then doing the homework. Of course when we started changing the font, the color, size, opening folders, using the jump drive, inserting pictures, etc. some of my co-workers were afraid to learn all that kind of new stuff and wanted to leave the class.

So anytime that I could encourage everybody to learn at least one thing and do the most they can to support the teacher, Ms. Ilna, I did. That way we will continue to have computer class.

Also, I want to thank, Ms. Ilna for all she does for us ~ her patience, her time, her dedication and hard work.
Let’s talk about something that is not talked about enough. She has encouraged all of her students to keep learning new things, having new ideas, Ms. Ilna is very supportive and very kind. She has also been understanding regarding the personal issues related to the students and has given advice in a positive way.

Ms. Ilna has maintained a very healthy environment in the class which makes it more interesting to keep learning. I look forward to attending the class every Wednesday.
