TEXES Remediation Policy-effective September 1, 2012

In an effort to ensure success on TExES state certification exams, students who do not pass an exam will be required to complete an assigned remediation activity before test approval will be granted. The Director for Certification Testing will determine the remediation activity after an assessment of the individuals' test results has been completed.

The Director for Certification Testing will notify candidates by email or phone with the assigned remediation activity.

This policy applies to current students in the Teacher Certification Program and candidates who have recently completed the Certification Program up until one year after completion. Remediation activities will continue until the candidate passes their state certification exam or up until one year after program completion, which ever comes first.

All certification candidates will be required to take a Practice TExES exam and review session, when applicable, before approval to test for a state exam will be granted. This includes students who have completed the Certification Program and have never taken a state exam.

If a candidate waits several years after completing the Certification Program to request approval to take a state exam, they may be required to take the Practice TExES exam again or required to take additional coursework before test approval will be granted.

It is highly recommended that all certification candidates take their state exams before completing the Certification Program and apply for certification once all requirements have been met. This means completing all required coursework and passing required state exams for their specific teaching certificate.

Please address all questions or concerns to the Director for Certification Testing:
